

# 2026 Spring PD

In the 2026-2027 academic year, ReimaginedED teaching will offer a series of Think Tanks. Our Think Tanks are full-day in person immersive teaching-learning experiences.

In our Think Tanks, educators will have the opportunity for in-depth explorations of specific content and effective pedagogy. Our Think Tanks are on-site collaborations, where all participants will actively engage in the teaching-learning cycle. As part of our work together, we will examine content learning trajectories, tools for assessing students' thinking, and ways to address children's development through lesson design and implementation.

We will also be using classroom lab-sites to study the implementation of lessons, analyze children's thinking (both oral or written), plan student conferences, and create math shares that both support and challenge each child's mathematical thinking.

## TWO-DAY THINK TANKS | 8:30 A.M. - 3:00 P.M.

In each of these two-day Think Tanks, we will explore how to develop partner talk in the K-5 classroom. We will share a series of routines that can be used to develop partner collaboration, deep listening, and clear communication. We will examine how specific structures (a Just-Right Games routines in the Grades K-2 Think Tank and a Problem-Solving routine in Grades 3-5 Think Tank) can be used to foster learning behaviors essential for vibrant student talk.

**\$500.00 PER PERSON FOR TWO-DAY PD**

**\$450.00 PER PERSON FOR TWO-DAY PD (SHOPDOE)**
